

Electronic components. Secure supply chains.

More than Distribution | Your Electronics Supply Chain Partner

More than Distribution

Your Electronics Supply Chain Partner

As a family-run business, we combine years of experience with exceptional reliability, a personal touch and the agility of an owner-led company. CAS is much more than a distributor of electronic components and IT hardware. We support you across your entire electronics supply chain, creating tailored solutions that go far beyond traditional procurement.

Your supply chain in safe hands

Our team brings together the know-how of management consultants, buyers, quality managers and logistics experts. The result: leaner processes, lower costs and a secure supply for years to come.

Independent distributor
Access to global sources, competitive pricing and solutions that aren't tied to any single manufacturer.

Experience and expertise
In-depth market insights, technical expertise and advice that looks at the whole picture.

Fast and flexible
Fast decision-making, direct contacts and quick solutions.

Strategic supply security
Tailored stockholding, financing and long-term parts availability.

> **"Expert, honest and open advice, always focused on solving the problem. A first-class partner I can wholeheartedly recommend."**
>
> **Head of Purchasing**
> Leading manufacturer of heating and cooling technology

Solutions for your entire electronics supply chain

From sourcing and quality testing to warehousing

CAS goes beyond traditional component sourcing, building tailored solutions that cut costs, reduce risk and keep your supply secure for the long term.

01 Distribution & Global Sourcing

Independent, worldwide sourcing of electronic components and IT hardware at competitive prices.

› **Your advantage:** Better availability and better purchasing terms.

02 Shortage & Obsolescence Management

Help with shortages and end-of-life parts through alternative sources and strategic sourcing solutions.

› **Your advantage:** Less production risk and a more secure supply.

03 Quality Assurance & Q-LAB

Testing of electronic components in our own Q-LAB and in close cooperation with audited partners to reduce quality and counterfeit risks.

› **Your advantage:** Greater confidence in critical parts.

04 Warehousing & Long-Term Storage

Strategic stockholding, long-term storage and flexible call-off models for dependable parts availability.

› **Your advantage:** Predictable supply and less capital tied up.

05 Strategic Inventory & Excess Management

Financing, stockholding and the international resale of surplus stock to optimise inventory and liquidity.

› **Your advantage:** Lower storage costs and better use of capital.

06 Supply Chain Consulting

Analysis of supply risks, leaner procurement processes and supply chain solutions tailored to you.

› **Your advantage:** More transparency and more resilient supply chains.

We think in solutions, not single orders

Your needs. Our portfolio.

Electronic components and IT hardware, sourced worldwide and independently

From standard parts to hard-to-find and obsolete components, our international sourcing network gives you access to a broad product range and sourcing solutions tailored to your needs.

Active components

ICs | Microcontrollers | Processors | FPGAs | Memory | Transistors | Diodes | Power semiconductors | Sensors | Optoelectronics | Power management ICs

Passive components

Resistors | Capacitors | Inductors | Chokes | Transformers | Filters | Crystals | Resonators | Ferrites | Potentiometers

Electromechanical & interconnect

Connectors | Relays | Switches | Push buttons | Fuses | Cables | Cable assemblies | Terminals | Contact systems

IT hardware

SSDs | Hard drives | RAM | CPUs | GPUs | Graphics cards | Server components | Networking | Industrial PCs

Modules & assemblies

PCBs | Displays | Embedded modules | Communication modules | Power supply modules | Heat sinks | Fans

Can’t find your part?

Whether it’s a shortage or an obsolete part, we check available sources worldwide and find solutions, even when other channels reach their limits.

Many industries, one reliable partner

Different requirements, the right solutions

From automotive to aerospace, CAS keeps companies across Europe's key industries reliably supplied with electronic components and IT hardware.

INDUSTRIES THAT TRUST OUR EXPERTISE

- **Automotive**
- **Aerospace**
- **Medical technology**
- **Energy & renewables**
- **Industry & automation**
- **Rail & mobility**
- **Telecoms & networking**
- **Data centres & AI infrastructure**
- **Security & building technology**
- **Consumer electronics & home appliances**

ARIANE 6

Our components in action, all the way to space

Electronic components supplied by CAS have also travelled into space on board Ariane 6.

Our quality assurance meets the highest standards

Modern test technology for secure supply chains

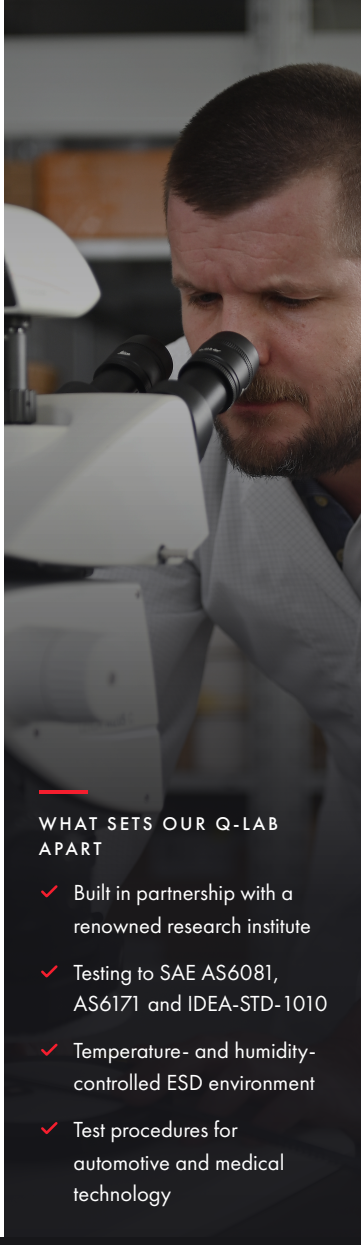

In our laboratory in Oberhaching near Munich, Germany, cutting-edge test equipment meets deep technical expertise. This lets us spot potential counterfeits and quality issues early and reduce risk across your supply chain.

01 **Marking & packaging inspection**
Checks on labels, component markings, packaging and ESD protection.

02 **Optical & X-ray inspection**
Microscopy and X-ray analysis to detect anomalies and signs of tampering.

03 **Functional & material testing**
Electrical tests, solderability tests and XRF analysis.

04 **Test documentation**
Documented test steps and traceable results.

WHAT SETS OUR Q-LAB APART

- Built in partnership with a renowned research institute
- Testing to SAE AS6081, AS6171 and IDEA-STD-1010
- Temperature- and humidity-controlled ESD environment
- Test procedures for automotive and medical technology

Warehousing & long-term storage

Professional storage that keeps your supply secure for years

We store and manage your electronic components professionally, for many years if needed. Controlled conditions, full stock visibility and flexible call-off arrangements keep your supply secure while reducing the capital you have tied up.

Climate-controlled & ESD-safe

Controlled conditions that protect sensitive electronic components over the long term.

Professional long-term storage

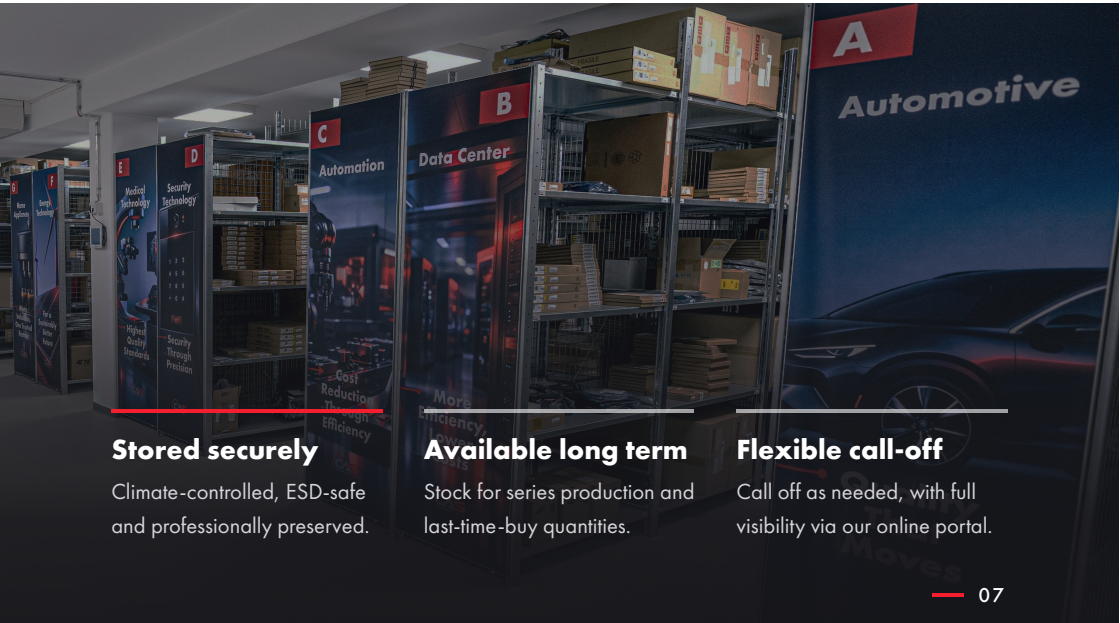

Expert preservation and storage of your parts, ideal for last-time-buy stock.

Full stock visibility

Check your stock levels at any time via our easy-to-use online portal.

Bonded & consignment warehousing

Flexible storage and call-off models with tailored financing, for easier planning and less capital tied up.

Stored securely

Climate-controlled, ESD-safe and professionally preserved.

Available long term

Stock for series production and last-time-buy quantities.

Flexible call-off

Call off as needed, with full visibility via our online portal.

Strong supply chains are built on strong partnerships

We look forward to speaking with you in person

"Let's work together to build solutions that strengthen your sourcing and keep your supply secure for the long term."
